

Commercial Control Dampers

CD-45/46

Airfoil Blade Control Damper

Class 1 and 1A Leakage

1" Jackshaft Available

Optional 304 Stainless Steel Construction

AMCA Certified for Air Performance and Air Leakage

Pottorff's **CD-45** (parallel-blade action) and **CD-46** (opposed-blade action) control dampers feature high-performing airfoil blades and a rugged hat channel frame to provide exceptional air control in medium to high pressure and velocity applications. They are a great solution for regulating airflow and reducing energy consumption for data centers, warehouses and distribution centers.
